

Motorcraft® Fuel Injector Cleaner

Motorcraft® Fuel Injector Cleaner is a powerful fuel additive, formulated using technologically advanced deposit-control chemistry.

When used as directed, Motorcraft® Fuel Injector Cleaner provides the following benefits:

- rapid clean-up performance on fuel injectors
- additional clean-up performance on intake manifolds, intake valves and ports and the entire fuel system (fuel lines, fuel tank)
- improved fuel combustion resulting in increased power and performance as well as reduced fuel consumption and emissions
- elimination of knocking and pinging caused by deposit build up (hot spots) in the combustion chamber
- prevention of engine octane requirement increase
- oxygen sensor and catalytic safe
- meets and exceeds OEM service requirements
- one container (250 mL) treats 32-48L of gasoline
